

**SMALL STEPS
TO SUCCESS**
Flexible Giving Program

**2017 NUCCA
Fundraising Campaign**

For many generations, NUCCA care has had a positive influence on how our bodies function, confirming that there is a very important relationship between the spine and central nervous system. Current technology now enables us to understand even more about the physiologic changes before and after an optimal correction of the upper cervical spine. This leads us to a greater awareness of what is possible in the realm of health care and well-being.

We deeply appreciate the continued support for our research from all of our donors. It enables us to move forward with innovative research in ground-breaking ways. In many instances, this leads us into new and unexplored territory working with researchers from many specialized disciplines around the world.

Our research work has been ongoing since 1971 and this year's focus is:

- 1) Publishing more papers with the data we have obtained from our various comprehensive clinical studies. Further analysis of the Chicago Hypertension Study and the Calgary Migraine Study has revealed additional information that is important to announce. Along with these past studies, the recent Image Guided Reliability Study will synthesize the data into clear findings for publication. We will share these findings with our NUCCA membership and all the scientific and academic communities we are linked to.**
- 2) Continued progress with our Practice Based Research (PBR)**
- 3) UCRF Research Society: Ongoing training of specialized NUCCA doctors to conduct research into case studies for publication.**

Every Donation Makes a Difference!

Your support today allows the Upper Cervical Research Foundation (www.ucrf.org) to continue its tradition of conducting NUCCA research to improve the quality of your health care.

There are many ways to make a contribution. Your donation can be made today as a one-time contribution or by sustained monthly donations throughout the year. You may also want to honor a special occasion or the memory of a loved one. As a non-profit organization, we rely heavily upon the support of our donors, and hope you will choose to join this important fundraising campaign this year.
